
TAK Project Index Documentation

Release 1.1.23

Toure A. Karim

Dec 26, 2020

QUICK REFERENCE

1	Getting Started with TAK Project Index	3
1.1	Getting Started	3
1.2	Project Summaries	3
1.3	Code Snippets	3
1.4	Licensing Rules	3
1.5	Copyrights	3
2	User-oriented Documentation	5
2.1	Software Packages	5
2.2	Building Projects	5
3	Developer Resource Center	7
3.1	Contributing	7
3.2	Code of Conduct	7
3.3	Source Code Styleguides	7
3.4	Common Questions	7
3.5	Suggest Enhancements	7
4	Indices & Tables	9

This is the top level of the TAK PI's technical documentation tree. TAK PI documentation, like the projects themselves, is very much a work in progress; that is especially true as we work to integrate our many scattered documents into a coherent whole. Please note that improvements to the documentation are welcome; send us a feedback if you want to help out.

GETTING STARTED WITH TAK PROJECT INDEX

These manuals contain overall information about how TAK Projects are developed. The TAK Projects community might be quite large, with thousands of developers contributing over the course of a year. As with any large community, knowing how things are done will make the process of getting your changes merged much easier.

1.1 Getting Started

TODO

1.2 Project Summaries

The following describes summaries and links for the most relevant projects in the space of TAK PI.

1.3 Code Snippets

1.4 Licensing Rules

The following describes the license of the TAK projects source code (Revised BSD), how to properly mark the license of individual files in the source tree, as well as links to the full license text.

1.5 Copyrights

USER-ORIENTED DOCUMENTATION

The following manuals are written for users of the TAK Project Index — those who are trying to download and install a given package from a project.

2.1 Software Packages

2.2 Building Projects

DEVELOPER RESOURCE CENTER

There are several resources and unsorted documents that don't seem to fit on other parts of the documentation body, or may require some adjustments and/or conversion to ReStructured Text format, or are simply too old.

3.1 Contributing

3.2 Code of Conduct

3.3 Source Code Styleguides

3.4 Common Questions

The easiest way to get help with the project is to join the #crawler channel on Freenode. We hang out there and you can get real-time help with your projects. The other good way is to open an issue on Github.

The mailing list at <https://groups.google.com/forum/#!forum/crawler> is also available for support.
